

Blount County (BC) Robotics

FIRST Robotics Team 4504

Sponsorship Opportunity 2025-2026 Season

Who We Are

We are **FIRST Robotics Team 4504 – BC Robotics**, a robotics team composed of multiple high schools based in Blount County, Tennessee. We compete in the **FIRST Robotics Competition (FRC)**, a global program that inspires young people to be science and technology leaders through hands-on STEM learning and competition.

Our mission is to develop the next generation of engineers, innovators, and leaders by building robots, participating in community outreach, and promoting STEM education.

Why Sponsor Us?

Your sponsorship helps us:

- Design and build an industrial-grade robot
- Register and travel to regional and national competitions
- Provide STEM outreach to our community and youth
- Inspire future innovators and engineers

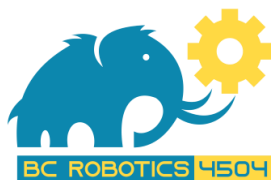

The vision of FIRST Robotics as stated by founder Dean Kamen, is *"To transform our culture by creating a world where science and technology are celebrated and where young people dream of becoming science and technology leaders."*

All teams must pay to enter competitions and materials needed to develop and construct a new robot each year. As a community team we can offset the cost through donations from local school systems, but we need additional support. Sponsors will have their company logo included on our marketing materials and our team shirts, as well as receiving promotional material to display at their place of business based on a tiered sponsorship level.

We look forward to sharing our growth and future successes with you! Your donation will allow our students to participate in a hands-on experience designed to foster self-confidence, communication and leadership! Thank you for your consideration.

Sincerely,

BC Robotics Team 4504
